

Pardon my interruption, but this news was just too astonishing to save for our regular broadcast. I Witness News has it on very good authority that Jesus has walked on water! Here with me now are two of the observers to tell us exactly what took place. Can I have your name sir?

John

And I'm Peter.

Thank you both. Now you say that you were in the middle of the lake and a terrible storm came upon you. You are obviously men acquainted with boat travel. Why would you go out in questionable weather?

It wasn't questionable when we set sail. In fact there was no storm until we hit about halfway across the lake.

We did everything trained fishermen would do and still we were about to go under. We were fighting for our lives!

But you did manage to make it to shore. What was it that you did that turned the tides in your favor?

We couldn't do anything to save ourselves. In fact we were so convinced that we were dead men that we looked up and saw death coming as a ghost on the water.

But it wasn't a ghost. It was the Master, Jesus. He came strolling along on top of the water just like it was any piece of dry land! I think He was about to walk on by when we started screaming in fear.

Now I know you guys have been traveling with Jesus for some time. Why wasn't He in the boat with you? Did something happen to break up the friendship?

No it was nothing like that. Jesus had just finished teaching a whole multitude of people about God. It was a three-day sermon! He sent us out first so we could get a little rest and said that He would catch up later. We figured He wanted to be alone to pray for a while. Then He would probably get one of the fishermen on the lake to bring Him out to us.

I saw Him in the boat when you all landed. So is that what He did to catch up to you guys?

No way man! He didn't come in any boat. He walked out on the lake just like we said.

That's amazing! Wait were there any stones He could have been stepping on as He crossed?

His path took Him right through the middle of the lake. Besides that, Peter even walked on water too.

Only for a little bit. Mine doesn't count. He had to grab me to keep me from drowning!

Yeah Pete, but at least you stepped out of the boat!

You actually walked on water too Peter? How did it feel? Would you do it again if you could? What made you sink?

It was a spur of the moment decision. It was amazing and terrifying all at the same time. I think I started sinking because I quit watching Jesus and looked at the waves instead. I think I will leave the "water walking" to Jesus.

It's not something Jesus does every day either, but when He does it is a sight to behold

Thanks guys for sharing that amazing story with us. The next time Jesus sends you off ahead of Him you could let us know so maybe we could see Him walking on water for ourselves. Now back to you in the studio.
